**What is a Mini Office?** A Mini Office is basically a custom built learning resource for your student. The goal of a mini-office is to serve as a self led reference chart for children, freeing up time for teacher to work with other students and encouraging children to find answers to their own questions. The benefit of making a mini office is also in the size and the minimal supply list. All you'll need is a couple of file folders, scissors, glue, and your printable pages. (Free Mini Office Printables Below)

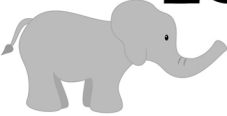

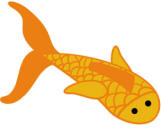

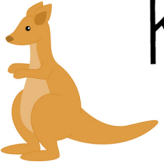

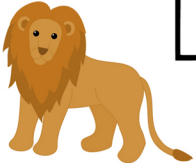

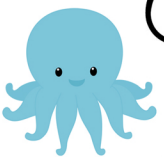

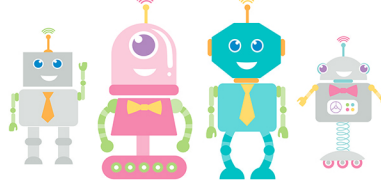

**How to Make a Mini Office:** To assemble your mini office simply cut the tabs off of two file folders and glue them back to back. This will create a three panel office. You can make a larger office if you want to include extra information, however I find that the three panel is useful for small hands and when it's stood on end it makes a great privacy blocker. (This is especially helpful if you're teaching around the kitchen table.)
